-Next month’s speaker will be Martin Trim with Barrett pumps

PRESENTATION
Presentation was put on by Jim LeStage with Holdrite with a focus on Seismic Standards. Seismic restraints are designed to prevent movement, damage and secondary damage to buildings. Seismic standards started back in 1755 after the Lisbon earthquake and continued to grow after several other large earthquakes in Italy, Japan, San Francisco and Santa Barbara. Some of the governing bodies overseeing seismic standards include, International Building Code (IBC), California Building Code (CBC), Uniform Building Code (UBC), DSA and OSHPD. Standards are set by (SMACNA) - Sheet metal & air conditioning contractor’s national association and ASHRAE - American Society of heating, refrigeration and air conditioning engineers.

Raffle & 50/50

Meeting adjourned at 1:00
