COURSE DESCRIPTION

Backflow 101

- Learn how to identify the different types of backflow devices and assem-
  blies.

- Learn which devices are required at typical cross connection locations such
  as irrigation systems, fire systems, carbonators and pools.

- Learn which devices need annual testing.

- See cutaways of backflow preventers that show what components are in
  them and which items wear out and need service.

- Meet technical experts and see products from Watts, Wilkins and Conbraco

Presentation by Sean Perry of Apollo Valves by Conbraco Industries
