Or call: 1-877-427-6601

COURSE DESCRIPTION

8 hours, .8 CEU’s

1/2 day-CPC Code Changes
In this seminar, participants will learn about the notable changes between the 2013 California Plumbing Code® and the 2010 edition. Accordingly, the changes are noted during the seminar and supporting information about the changes is provided. General topics such as definitions and general requirements are covered as well as specific topics that include water heaters, water supply and distribution, traps and interceptors, and health care facilities, medical gas and vacuum systems. Chapter 16 has been completely rewritten and with a new Chapter 17 on Rainwater Catchment Systems, the important provisions from these chapters will be covered in greater detail.

Upon completion of this seminar, participants will be better able to identify and describe the significant code changes that occurred from the previous edition as well as significant additions and deletions from the code.

1/2 day-CMC Code Changes
In this seminar, participants will learn about the notable changes between the 2013 California Mechanical Code® and the 2010 edition. Accordingly, the changes are noted during the seminar and supporting information about the changes is provided. General topics such as definitions and general requirements are covered as well as specific topics that include exhaust systems, duct systems, chimneys and vents, hydronics, steam and hot water boilers and fuel gas piping.

Upon completion of this seminar, participants will be better able to identify and describe the significant code changes that occurred from the previous edition as well as significant additions and deletions from the code.
