MEETING NOTICE

The next meeting of the Sacramento Chapter of IAPMO will be held:

TIME: 11:30 A.M.

DATE: Thursday, November 21, 2013

PLACE: Dante Club
2330 Fair Oaks Blvd.
Sacramento, CA 95825

Cost: $20

NOTE:
Please RSVP by Friday, November 15, 2013

Stephanie Rice, LEED AP, Director of Education & Training for Ygrene Energy Fund will be our speaker. Stephanie is responsible for developing and delivering Ygrene’s Certified Contractor curriculum nationwide.

Prior to joining Ygrene, Stephanie worked for industry notables — Boldt, DPR and Sundt Construction Companies.

FAX YOUR RESERVATION TO (916) 475-1695 or respond by return email.

Yes – I will be there ______  No - Cannot make it this time ______

# Clean Energy Improvements

**Residential Benefits**

<table>
<thead>
<tr>
<th>Reduced Utility Bills</th>
<th>Improved Comfort &amp; Air Quality</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increased Home Value</td>
<td>Environmentally Friendly</td>
</tr>
<tr>
<td>Lower Maintenance Costs</td>
<td>Reduced Water Use</td>
</tr>
</tbody>
</table>

- **Solar Photovoltaic Systems**: Solar PV systems can reduce your electricity bills by up to 80%, saving you money and enabling you to produce your own energy from a clean, sustainable source.

- **Cool Roofs**: Replacing your aging or leaky roof with a cool roof that reflects the sun’s heat is a long-term improvement that can last 20 or more years. Cool roofs save you money by reducing your air conditioning demands in warmer weather.

- **Heating & Air Conditioning**: Heating and cooling accounts for more than half of the average home’s energy use. Upgrading your aging systems can reduce related costs by as much as 50%. New, efficient HVAC systems are also quieter and produce cleaner air.

- **Air Sealing & Insulation**: Sealing and insulating the “shell” of your home - particularly around windows, vents and ducts - is a cost-effective way to save up to 20% on heating and cooling costs.

- **Windows & Doors**: Replacing old windows, skylights and doors with multi-pane or other efficient products can reduce your energy bills by up to 15%.

- **Tankless Hot Water Heaters**: By heating only the hot water you need, when you need it, tankless hot water heaters are 25-35% more efficient than conventional systems.

- **Solar Thermal Water Heating Systems**: Solar thermal water heating systems produce savings of 50-80% while protecting you from the effects of energy price hikes.

- **Water Efficiency**: Upgrading your home’s toilets, plumbing fixtures and irrigation systems can reduce your family’s water consumption by 50,000 gallons annually.
