Speakers were Philip Hope and Christopher Mack from Skywell LLC of Santa Monica. Discussion was on Atmospheric Water Generators. From an in Office or home unit that plugs in your 110 outlet that may produce around 8 gallons a day of drinking water, to a large commercial unit producing hundreds of gallons a day! Like the one they have installed and in use at Dodger Stadium for irrigation purposes. Currently they are working on standards and listing the product to NSF 343. The Moisture is pulled from the environment thru a static filter then a UV filter then carbon filtration to cold storage and is treated by Ozonation, storage water is recycled every 24 hours.

Adjournment
Jaime Gomez adjourned meeting at 9am, various door prizes were awarded from IAPMO and a special Thank you from Ted Hebert and Williams Furnace for their Donated prizes.

Respectfully submitted,

Shane P. Peters
