INTRODUCTION TO GRAY WATER SYSTEMS DESIGN

SAUM K. NOUR, Ph.D., CPD, CFPE, PE
OF ABSOLUTE CONSULTING ENGINEERS

MANY CITIES ARE ENCOURAGING PLUMBING DESIGN BASED ON LEED’S CRITERIA.

WHAT IS LEED?

Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ encourages and accelerates global adoption of sustainable green building and development practices through the creation and implementation of universally understood and accepted tools and performance criteria. For more information visit: www.usgbc.org

ONE AREA OF APPLICATION OF LEED IS THE USE OF GRAY WATER PLUMBING SYSTEMS (CHAPTER 16 OF THE 2006 UNIFORM PLUMBING CODE). WITH THE ENCOURAGEMENT OF LEED AND GREEN BUILDING DESIGN BY MANY OF THE LOCAL CITIES, GRAY WATER PLUMBING SYSTEMS APPLICATIONS ARE EXPECTED TO INCREASE.
