No charge for IAPMO National “E” & National Members  
(Have your membership card with you)

Presentation
How to Extend the Life of Water Heaters

Charlie Campbell, President of Topeka Winsupply, will give an in-depth presentation on extending the life of tank type water heaters. This is a detailed description of an area often missed by plumbers as it isn’t part of the code, yet plumbers often get blamed, or asked to warranty a water heater, or other plumbing product due to a shortened life that may not be caused by the product itself. How do you know? How do you cover your bases? Knowledge is power. Check out this informative class where we will discuss an area many overlook, plus ways to defend the “box store price” issue. What about them makes them less expensive?

***************************************

There is limited seating for this class and admittance will be on a first come first served basis. This class is accredited by the City of Topeka and will be good for 2 hours of “trade related” CEUs for the Plumbing trade. It is accepted in most jurisdictions for the yearly state mandated CEUs to maintain your license.

This class will be good for Plumbing CEUs.

You will earn 2.0 CEUs upon completion of the course.
