The meeting was called to order at 7:05 PM by Chairman Dana Colombo. There were 10 members and guests present.

Roll call of officers was made by Secretary / Treasurer Curtis Mezzic.

Mr. Mezzic read the minutes from the June 30, 2009 meeting. There was a motion made and seconded to accept the minutes as read. Motion passed by voice vote.

Mr. Mezzic read the finance report. A motion was made and seconded to accept the finance report. Motion passed by voice vote.

Old Business: There was no old business to discuss at this time.

New Business: Our guest speaker for this meeting was Mr. Michael Billingsley of Billingsley & Associates, Inc. He gave a presentation on Watts manufactured trench drains, fixture carriers and cleanouts. He stated Watts features dead level pre-sloped trench drains as well as the more traditional trench drain products. The drains are injected molded polypropylene channels with standard ductile iron or polypropylene frames. He went on to explain and describe the Watts standard water closet carrier will support wall hung “off the floor” water closets independent of the wall structure. They anchor to the floor behind the finished wall, effectively transferring the load from closet to the structural floor. Next, Mr. Billingsley explained and described the Watts floor mounted fixture carrier that provides structural support lavatories. These types of carriers work independently of the finished wall structure and are generally specified in commercial applications. And finally, Mr. Billingsley presented a industrial grade cast iron floor cleanout. The Watts cleanout has the standard epoxy coating which provides superior chemical and shock resistance. At the completion of the presentation, Mr. Billingsley answered the questions about his products from the membership.

A motion was made and seconded that the meeting adjourns, motion carried by voice vote. Meeting adjourned at 8:30 PM.
