Backflow Prevention & Cross-Connection Regulation  |  Instructor: Sean Cleary, IAPMO BPI

This four-hour seminar will look at both federal and state regulations related to backflow protection and cross-connection control. The hydraulics principles involved in backflow incidents will be discussed along with selection of the proper device, assembly, or method needed to protect the water system. Specific regulations in the MN Uniform Plumbing Code related to cross-connection control will be covered along with the development and revision of product and professional qualifications standards adopted in the plumbing code.

LUNCH WILL BE PROVIDED BY THE MINNESOTA CHAPTER OF IAPMO AFTER THE FIRST CLASS

Register Today!

To register for this four-hour seminar, visit www.bit.ly/iapmo-mn. $80

* Students may only attend one of the sessions.
