IAPMO Meeting Thursday April 26, 2012

Condensing Tankless Water Heaters

Bob Miedema, Western Regional Service Manger, Rinnai American Corporation will describe the features and benefits of the latest condensing tankless water heaters.

Coping with condensation, the installer should slope the horizontal venting 3/4 inch per foot either toward the appliance with a condensate collector or toward the exhaust terminal. Plumbers should inspected the vent systems annually for signs of damage or condensate leaks. If the vent system appears damaged the appliance must be turned off and the vent system repaired.

The lunch is $20.00, non-members, company employees, guests are always invited, so bring a friend. Please RSVP to Bill Laub by Tuesday, April 24, 2011. If you RSVP and get on Bill's list you get one free raffle ticket.
