November Chapter News:

We will have a presentation by Joel Strehle on Green Turtle Technologies - Fiberglass Grease Interceptors designed for above and below grade installations. Green Turtle is a leading innovator and provider of wastewater source pollution containment technology for commercial, institutional, and industrial applications. Their products provide a platform for sustainable solutions that help clients maintain profitability, while protecting the community’s watershed and public health. Presented through Brad Kliman - Kliman Sales.

December 9th Meeting:

We will once again have a session of the IAPMO Code Olympics. This fun event will again feature cash prizes to the winning team. Come and see how much you really know (or don’t know) about the plumbing and mechanical industries governing code regulations.

October 12th Meeting:

We had Laure Pomianowski from UL Laboratories as our guest speaker. We learned about this independent product safety certification organization that develops standards and test procedures dealing with product safety for many products, materials, components, assemblies, tools and equipment.

We also had a brief summation by our Chapter Vice Chairman - Leonard Ramociotti, of some of the final points considered at the recently held IAPMO National Education and Business Conference Meeting, September 25th - 29th, in San Antonio, TX.

Members Needed!

Once again, we ask that ask that any individuals, contractors, engineers and governmental agencies with an interest in the plumbing/mechanical trades and associated building code interpretation and implementation to please consider supporting our group with their membership and meeting attendance. Our speaker list is mostly varied and relevant. Please call Jeff Karhohs at (775) 771-3144 for more information.

Our Chapter is Only As Strong As Your Active Participation
