The meeting was called to order at 6:30 PM on September 18th, 2014 by Chairman Garth Bentley.

Self introductions were made by the 28 members, and guests who were present.

Minutes from the previous meeting for July 17th, 2014 were approved.

Following dinner break: Garth Bentley: IAPMO wants all chapter members to join the national organization also as a requirement for membership in the local chapter. Discussion with the members ensued.

Garth Bentley: The new Oregon Plumbing Specialty Code books should be available sometime in October.

Garth Bentley: The continuing education requirement to maintain a Journeyman Plumbers license is 24 hrs total of code related plus code change credits; at least 8 hrs of the total must be code change credits. At least 4hrs of the total must be on Oregon Rule and Law.

Open Forum: the question was asked; What type of glue is to be used for connecting a plastic washer box to an ABS or PVC standpipe? This question had people stumped. It is the opinion of some that the plastic box is ABS (this needs to be verified), therefore, a PVC standpipe would have to be adapted to ABS in order to make the joint.

A motion to adjourn was entertained and approved. The Meeting was adjourned.
